

Anti- *Helicobacter pylori* Monoclonal Antibody

Capture

Target

Helicobacter pylori is a common human pathogen implicated in certain gastrointestinal diseases. H.pylori infection is a common, usually lifelong, infection that is found worldwide. Studies suggest that infection rates vary according to geographic region, but the number of infected people has persisted or even increased over the past three decades because of population growth and because of reinfection and recrudescence due to unsuccessful eradication.

Description

Product name

Anti- *Helicobacter pylori* Monoclonal Antibody

Host species

Mice

Storage instructions

Upon delivery aliquot. Store at -20°C long term. Avoid freeze / thaw cycle

Storage buffer

Constituents: PBS, Glycerol

Purity

Protein G purified

Isotype

IgG

Quantity

As requested

Applications

Please Note: Optimal dilutions should be determined by each laboratory for each application.

Recommended

Concentration

ELISA Detection

1-4 µg/mL

Standard

Helicobacter pylori Ag

Anti- Helicobacter pylori Monoclonal Antibody

Detector
